## About Me

I'm a developer with a strong foundation in both front-end and back-end technologies. I'm highly motivated to enhance my skills in line with the latest updates. Currently, I'm focusing on expanding my experience as a back-end developer while simultaneously boosting my knowledge in front-end development. I'm eager to take on new challenges and learn more in this ever-evolving field of programming.

---

## Projects (all projects are on my GitHub)

- [Personal Portfolio](#) (React & Next JS, TypeScript, Tailwind CSS, Framer Motion, React Email, Resend)
